a
response profile
profile correlation
same day, even vs odd
other day, same neuron
other day, nearest neuron
other day, random neuron
days apart
b
profile stability index
stability index
SP054
SP058
SP061
SP066
SP067
SP072
days apart
c
per neuron
across-day r (median)
1-2 days
>14 days
same-day ceiling
even/odd reliability
d
maps across neurons
correlation across neurons
same day, even vs odd
chance
activity level
reward d'
stimulus d'
choice d'
days apart
e
sensitivity persistence
P(sig., same sign | sig.)
stim (3.4% sig.)
choice (2.6% sig.)
same day, even vs odd
chance
days apart
f
decoders
balanced accuracy
stim
choice
same day, even vs odd
chance
days apart
g
all metrics
fraction of baseline kept
profile
activity level
stim map
reward map
stim sensitivity
stim decoder
choice sensitivity
1 = same-day baseline
0 = chance
days apart
h
per metric
fraction of baseline kept
1-2 days
>14 days
